Did you know?

Here at The Garden Rooms we build the base of the Garden Room for our customers, including all costs within our quotes. Most Garden Room companies do not, charging you extra for the service.

Why choose a Garden Room?

A Garden Room is a cost effective way to create more space in the home, and with different sizes and designs to choose from, they can be built to your budget.

A garden room can be used for a number of things, such as a home office, an extra bedroom, a home gym, music room or just to sit and read the paper and watch the garden grow. A Garden Room creates a lovely space to work in, but taking all of the distractions from the house away, providing peace and quiet from the home life.

As you will see Garden Rooms can vary in style, from the modern designs to the more traditional layouts. However, whilst keeping the distractions out whilst working, it also brings you closer to the outdoors whilst relaxing and creating extra room for entertaining. Owning your own Garden Room does not mean you need a large garden, we will work with you throughout the design process to create a tailor-made garden room to suit you and your garden.

As mentioned, Garden Rooms come in all shapes and sizes. However, we also offer many different optional extras which you will see later in the brochure.

A garden room will be a peaceful retreat, an escape from the worries of life, which is why at The Garden Rooms we believe the stress-free environment starts from the designing process. Giving you 100% control of the layout and offering advice when asked for.
